

BERD

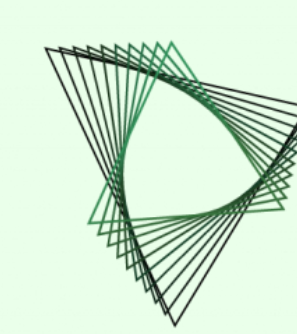

@NFDI

Discover all our tools, resources, and services on our website.

ABOUT BERD

BERD@NFDI offers a service landscape designed to transform the management of **Business, Economic, and Related Data**. We provide social science researchers with the tools and services they need to work with (unstructured) data, such as images, videos, audio, and text. Our comprehensive services cover the entire data lifecycle – from collection and processing to analysis and preservation – making research easier and more efficient at every stage.

OPENBIGDATA.org

Open Big Data offers an exclusive selection of high-quality research data in business, economics, and related social sciences. Whether you are conducting research, developing new algorithms, or seeking data for educational purposes, our repository has something to offer for everyone.
