

The German Reproducibility Network (GRN)

What is it and what do we do?

What is the GRN?

- Peer-led cross-disciplinary consortium, which aims to foster reproducibility, trustworthiness and openness of scientific research on a national level
- Activities:
 - Promotion of training and education on open science practices
 - Bringing stakeholders together
 - Various exchange formats (e.g., virtual brainstorming events, workshops)
- Founded on February 1, 2021
- 40 members (as of September 2024)
 - 35 Reproducibility Initiatives
 - 4 Research Institutions
 - 1 Academic Society

What do the GRN do?

- Representing the commitment of research institutions and groups to Open Science and Reproducibility

- Connecting and collaborating with GRN members on events, position papers about Open Science and Reproducibility and training (e.g., Open Science Summer Schools)

- Supporting researchers from member institutions or research groups by sharing best practices for research and training in Open Science and Reproducibility

- Advocating for working conditions that foster open and reproducible research practices (e.g., publication, press releases + nation-wide media coverage on WissZeitVG)
